INVESTMENT PHILOSOPHY

Objective:

To provide strong risk-adjusted returns in all market environments as well as relative to a comparable benchmark and our peers.

Product Description:

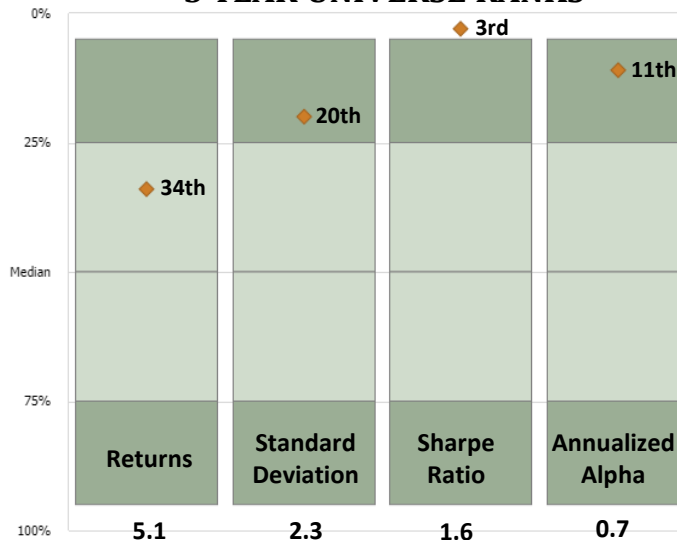

- Intermediate strategy focusing on U.S. Treasury and Agency notes and investment-grade corporates.
- BBB securities within the product are limited to benchmark weight.
- Effective duration is maintained within 20% of benchmark.
- Alpha is derived from four main sources: duration, yield curve, sector allocation, and security selection.

Investment Process:

Our investment process forms the foundation of a disciplined and consistent approach to portfolio construction:

- Interest rate and yield curves are evaluated by reviewing current and historical market factors.
- Sector analysis is accomplished by determining relative value among sectors incorporating fundamental and technical factors.
- Security selection is achieved by screening the universe with a proprietary relative value model, comparing credit quality of an issuer's fundamentals based on multiple financial metrics and spreads.
- An optimal portfolio is constructed by combining idea generation with specific client portfolio guidelines.

Gross returns do not reflect the deduction of investment advisory fees but do include transaction fees. Gross and net returns include the reinvestment of all dividends and income. Net of fee performance was calculated by reducing the actual management fee charged to clients, or if part of a balanced account by reducing the highest management fee charged, in accordance with the Intermediate Fixed Income strategy fee schedule. Prior to 12/31/2015, the highest management fee was utilized to calculate net-of-fee performance.

Performance is in U.S. dollars. Prior to 12/31/2010, accounts were removed from the composite for the month in which a significant flow exceeded 20% of account value.
