INVESTMENT PHILOSOPHY

Our investment philosophy focuses on companies that grow their earnings faster than the market, are more profitable than the market as measured by ROE & ROA, trading at a discount to the market as defined by P/E ratios, and generally have lower price volatility than the market. Although the emphasis is stock selection, being able to identify and control risk at the portfolio level is an important component of the strategy. Our quantitative and fundamental blended investment process helps us to identify these types of companies and build portfolios that exhibit these characteristics in our attempt to provide our clients long-term outperformance with less risk.
