INVESTMENT PHILOSOPHY

Objective:

To provide strong risk-adjusted returns in all market environments as well as relative to a comparable benchmark and our peers.

Product Description:

- High-quality core strategy focusing on U.S. dollar-denominated government, investment-grade corporates, and agency mortgage-backed securities.
- BBB securities within the product are limited to benchmark weight.
- Effective duration is maintained within 20% of benchmark.
- Alpha is derived from four main sources: duration, yield curve, sector allocation, and security selection.

Investment Process:

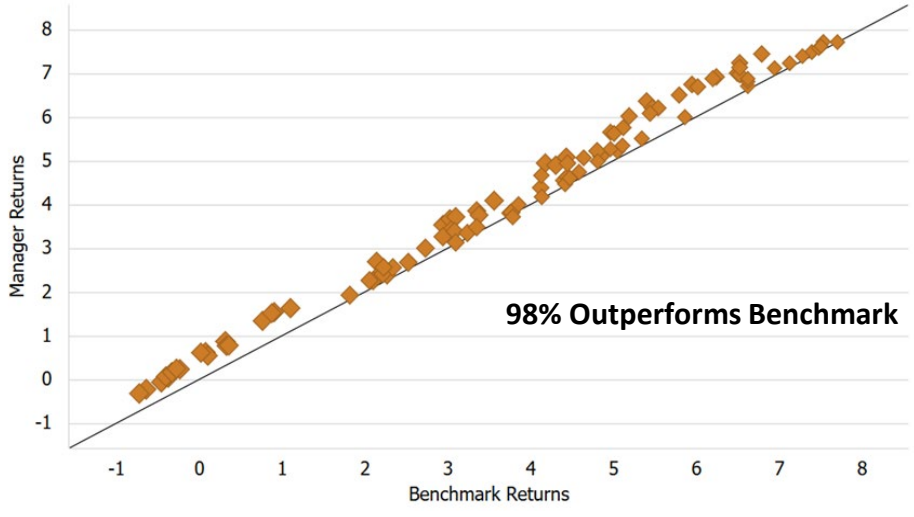

Our investment process forms the foundation of a disciplined and consistent approach to portfolio construction:

- Interest rate and yield curves are evaluated by reviewing current and historical market factors.
- Sector analysis is accomplished by determining relative value among sectors incorporating fundamental and technical factors.
- Security selection is achieved by screening the universe with a proprietary relative value model, comparing credit quality of an issuer's fundamentals based on multiple financial metrics and spreads.
- An optimal portfolio is constructed by combining idea generation with specific client portfolio guidelines.
